

Innovative Building Solutions

Engineered & Manufactured by Sprung Instant Structures

People's Church
 Grande Prairie, Alberta, Canada
 Outreach Community Center

Project Report:

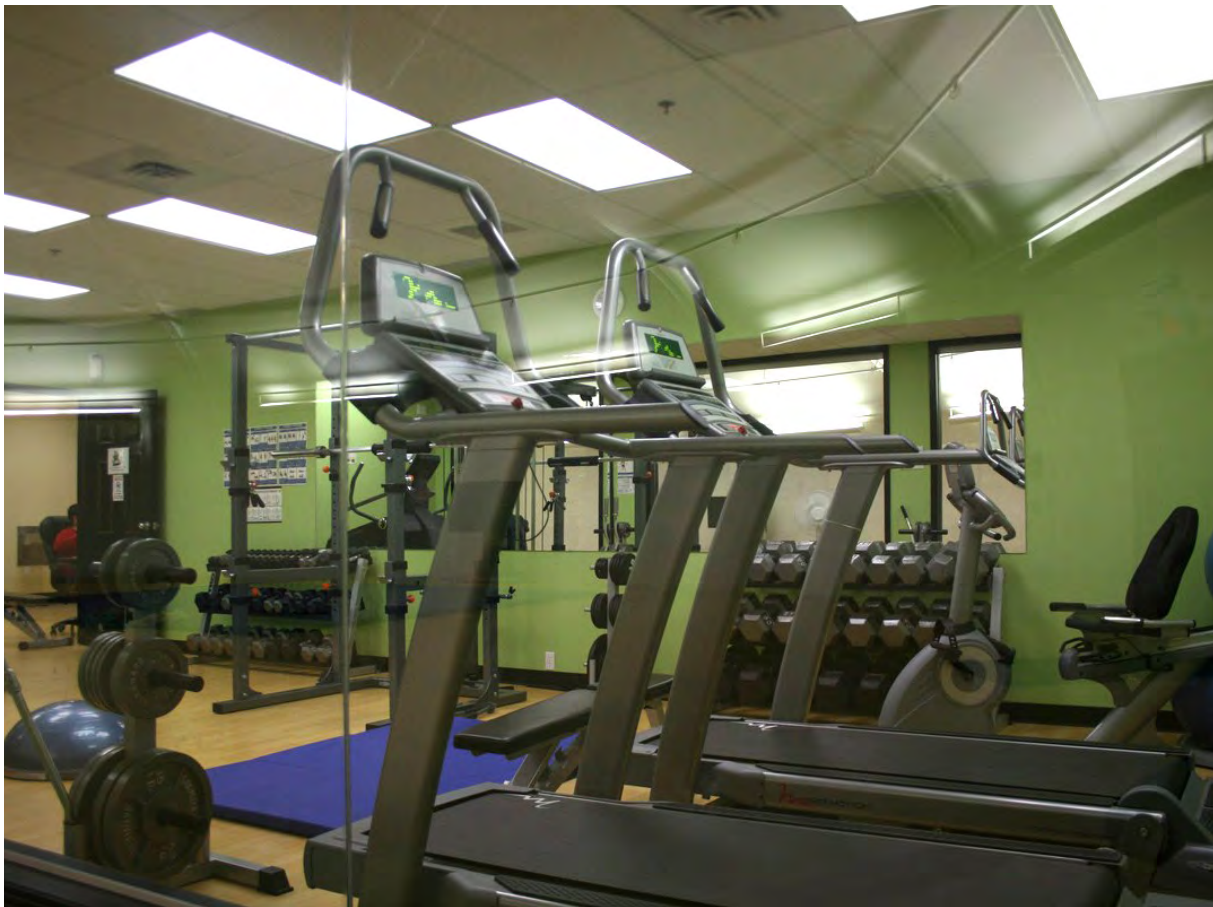

The People's Church located in Grande Prairie Alberta Canada, is a rapidly growing congregation. With a surge in youth attendance over the past several years, the church needed to add a stand alone youth facility that would accommodate a variety of applications. After careful consideration of a number of building alternatives, a Sprung structure was selected as the right

solution due in part to the distinctively different modern tension membrane architecture. This 90' x 195' Sprung structure includes an R28 fiberglass insulation package, Concord Cream and Brownstone Red Dupont Tedlar architectural exterior membrane colors complete with exterior REACH CENTRE logo. The clear span design is ideal for multipurpose youth facility activities which include a large gymnasium, fitness centre and café. The double layer of daylight panels in the peak of the structure provide the optimum amount of natural daylight while reducing operating costs.

Top 5 Reasons to Choose Sprung:

- 1.** Wow Factor – Create buzz by unveiling Sprung’s sleek, innovative and eye-catching structure as a unique landmark in your community.
- 2.** Immediate Delivery from Inventory – Complete projects in a much shorter time-frame than conventional construction.
- 3.** Rapid Construction Schedule – Significantly reduce construction costs and timelines compared to conventional construction.
- 4.** Superior Acoustics – Enhance the richness, roundness and fullness of sound for your audience or congregation.
- 5.** Multi-functional Spaces – Uplift your guests in worship, recreation, and hospitality spaces with Sprung’s high, open vaulted ceilings.

Sprung Structures

For four generations, Sprung has designed solutions for every conceivable application. Inventory-ready building solutions that consistently outperform other building alternatives.

- Sprung structures can be dismantled, reconfigured, re-erected, or relocated for almost any number of applications and virtually every market sector in the world.
- Beyond providing all-weather shelter for equipment and inventory, Sprung structures provide bright, spacious high performance, energy efficient environments.
- To date, Sprung has completed over 12,000 structures in more than 100 countries worldwide.
