### Title:

CLASSIFICATION OF REACTION TO FIRE PERFORMANCE IN ACCORDANCE WITH EN 13501-1:2007+A1: 2009

#### **Notified Body No:**

0833

### **Product Name:**

Insulated Sprung Building Wall Construction

**Report No:** 

348466

### Issue No:

2

### Prepared for:

Sprung Instant Structures Ltd 80039 Maple Leaf Rd E Aldersyde Alberta Canada TOL 0A0

Date: 4<sup>th</sup> April 2016

## 1. Introduction

This classification report defines the classification assigned to "Insulated Sprung Building Wall Construction", PVC architectural fabrics stretched between aluminium beams with a foil faced fibreglass blanket insulation filling the cavity based insulated wall system, in line with the procedures given in EN 13501-1:2007+A1: 2009.

### 2. Details of classified product

### 2.1 General

The products, "Insulated Sprung Building Wall Construction", PVC architectural fabrics stretched between aluminium beams with a foil faced fibreglass blanket insulation filling the cavity based insulated wall system, are defined as being suitable for construction applications, excluding flooring and linear pipe thermal insulation.

### 2.2 Product description

The product, "Insulated Sprung Building Wall Construction", PVC architectural fabrics stretched between aluminium beams with a foil faced fibreglass blanket insulation filling the cavity based insulated wall system, are fully described below and in the test reports provided in support of classification listed in Clause 3.1.

General description	PVC architectural fabrics stratched between aluminium beams			
General description	with a foil faced fibreglass blanket insulation filling the cavity			
	with a foil faced libreglass blanket insulation filling the cavity			
Product reference of composite	"Insulated Tensioned Membrane Structure Assembly"			
Overall thickness of composite	254mm (stated by sponsor)			
Diagram of system	Zowinin (stated by sponsor)			
	[1254] 49 3/8" [1000] 39 3/8" [254] 10" [254] 10" [			

		Product reference	"Tedlar" (top coat)	
		Generic type	Polyvinyl fluoride film	
	Tedlar coating (test face)	Name of manufacturer	DuPont (applied by Seaman Corp)	
		Number of coats	1	
		Application rate	60 g/m <sup>2</sup>	
		Application method	See Note 1 below	
		Colour reference	"Desert Tan"	
		Flame retardant details	See Note 1 below	
		Product reference	"Adhesive Coated Fabric"	
		Generic type	PVC on polyester fabric base	
- D	PVC	Name of manufacturer	Seaman Corporation

# 4. Classification and field of application

# 4.1 Reference of classification

This classification has been carried out in accordance with clause 8 of EN 13501-1:2007+A1: 2009.

# 4.2 Classification

The product, "Insulated Sprung Building Wall Construction", PVC architectural fabrics stretched between aluminium beams with a foil faced fibreglass blanket insulation filling the cavity based insulated wall system in relation to their reaction to fire behaviour are classified:

С

The additional classification in relation to smoke production is:

s'3

The additional classification in relation to flaming droplets / particles is:

The format of the reaction to fire classification for construction products excluding flooring and linear pipe thermal insulation is:

Fire Behaviour		Smoke Production			Flaming Droplets	
С	-	s	3	,	d	0

i.e. C – s3 , d0

# Reaction to fire classification: C – s3, d0

### 4.3 Field of application

This classification is valid for the following end use applications:

- i) Construction applications mechanically installed without the presence of a substrate and with an air gap.
- ii) Construction applications up to 18m high. Construction applications over this height are not covered by this report.

This classification is also valid for the following product parameters:

Product thickness Product colour / pattern (exposed face) Product colour / pattern (reverse face) Insulation thickness Insulation density Product construction No variation allowed Any Any No variation allowed No variation allowed No variation allowed

### 5. Limitations

This document does not represent type approval or certification of the product.
