

## Sprung Shield

Sprung Shield is a light weight rolled aluminum panel installed around the perimeter of the structure to the height of 8' (2.43m) and is available in a variety of colors and textures

### Benefits of Sprung Shield

- Offers protection against damage or vandalism that typically occurs at the lower 8' (2.43m)
- Various colors and textures are available that may assist in meeting stricter architectural guidelines
- Sprung Shield is a non-flammable material that passes ASTM E84 and UBC 17-5
- Standard insulation packages are available with the addition of Sprung Shield
- Windows, personnel doors and ventilators can be integrated with the Sprung Shield wall
- The exterior paint finish is estimated to last for 20 plus years without fading or peeling
- The flexible and bendable panels follow the natural contour of the Sprung Structure
- Available for applications on the exterior or interior
