About the Project

THE ASK

The EUE Screen Gems Studios is an 11 stage, a 33-acre studio complex in Atlanta, Georgia. Screen Gems Studios has close to 300,000 ft² of production and office space, and with the rapidly growing film industry in Atlanta, Screen Gems recognized the need for additional on-site mill space to offer clients. The lack of space for filming and set construction on-site was becoming a major concern that needed to be rectified quickly. Their need for a high-quality, flexible space that could be built with a quick turnaround time was the driving factor that caused Screen Gems to turn to Sprung Structures for assistance.

HOW SPRUNG DELIVERED

Initially, Screen Gems approached the Sprung Structures team with the idea to potentially lease a structure for a year period. After several meetings, including a visit to the local Atlanta Marriott Sprung structure, the project grew from one rental structure to three permanent and insulated Sprung structures adding up to approximately 33,000 total sq ft. These structures were complete with a Tan and Green Kynar exterior membrane and a 25-year pro-rata guarantee.

Other unique features of these structures include a custom antique white interior liner and the use of our new XXL jumbo penetration kits for hooking up portable air conditioning units. These are beneficial to have in a scenario where one of their clients decides to upgrade their mill space rental with air conditioning during a hot Georgia summer. These structures are also made with daylight panels incorporated along the peak, which not only allows for natural light and a great working atmosphere but also facilitates savings on monthly lighting costs. From the time of order to completion, the turnaround time for this project was approximately 6 months.

About Screen Gems

Opened in 2010 by the Cooney family, the Screen Gems Studios are just ten minutes away from Hartsfield Jackson Atlanta International Airport, which offers daily flights every hour to and from Los Angeles and New York City. Screen Gems is located only five minutes away from the heart of downtown Atlanta and several luxury hotels. Georgia's vibrant film and entertainment scene, along with digital tax credits of up to 30 percent make for a lively, busy, and professional industry community. Screen Gems' full-service Atlanta studio complex offers 11 sound stages with 250,000 sq ft. of production space. Stages 10 and 11 can be combined to provide 30,000 sq ft of column-free production space. Stages 7 and 8 also offer a combined, column-free space of 37,500 sq ft under one roof. Screen Gems Studios has hosted over 30 scripted television shows and feature films since their grand opening in 2010, and at this time, the complex was the first full-service production studio campus to open in Atlanta.

THE SPECS

60' wide x 180 long | 60' wide x 195' long
70' wide x 150' long | Full insulated

Screen Gems Studios has used 3 Sprung Structures on site. These structures incorporated Side Sliding Doors, End Sliding Doors and Flat End Sliding Doors. These doors have performed well for the intended application and are more manageable and require less maintenance than our Steel Rolling Doors”

– Billy Stoll
Executive Vice President,
EUE/Screen Gems Studios, Atlanta

Why Sprung for the Film Industry

We understand the film industry is unique to other industries, and likewise faces its own unique set of challenges, from labor shortages to supply chain issues and tightening margins. When aligning with Sprung, our team of professionals can help you get back to your core business. We provide:

- Rapid construction
- Design flexibility
- STC 48 rated wall system (Sound Transmission Class)
- Performance & durability
- Lower overall costs

With Sprung Structures, your new project can be up and running faster and more cost-effectively, designed with your specific vision and unique needs in mind.

The Sprung Difference

► SPRUNG CARES

Our teams work in some of the most vulnerable environments and harshest conditions. At Sprung, we are deeply committed to positively impacting the communities we serve and applying our innovative ideas to help solve complex problems.

► UNMATCHED REPUTATION

Invest in the most reliable, versatile and technically advanced structures globally: Sprung has erected 13,000 structures in more than 100 countries.

► ENGINEERED FOR EXTREME CLIMATES

Sprung structures are engineered to withstand extreme weather conditions.

► IMMEDIATE DELIVERY FROM INVENTORY

Complete projects in a much shorter time frame than conventional construction.

► CUSTOMIZABLE

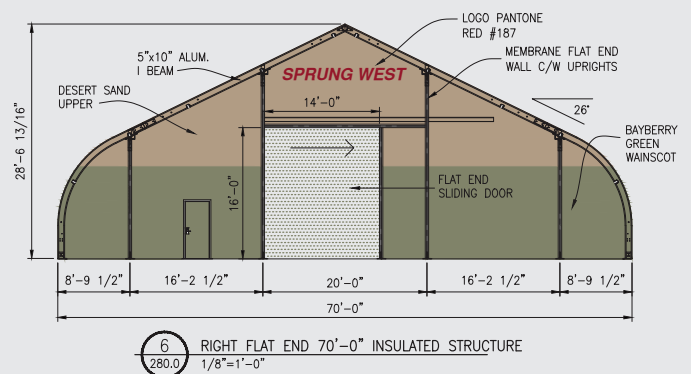

Customizations include performance insulation packages for superior indoor climate control, peak integrated daylight panels, doors and entryways for every application, and countless accessories.

► LIMITED FOUNDATION REQUIREMENTS

Save on foundation costs where appropriate soil conditions exist. Concrete foundations are not required for Sprung structures up to 160 ft. in width, saving time and cost for installation.

► COST-EFFECTIVE, COMPACT SHIPPING

Enjoy the convenience and cost savings of shipping up to 15,000 sq. ft. in a single, standard ISO container.

About Sprung

Sprung meets rapid-response building needs in a wide range of leading businesses and organizations including the global armed forces, the natural resources industry, manufacturing, commercial gaming, education, disaster recovery, healthcare, aviation as well as sports and recreation. Sprung has designed and patented tensioned membrane technology that outperforms other building alternatives and offers a faster, better build. Year after year, we continue to engineer the most innovative, versatile and reliable building solutions.

Sprung has designed and patented tensioned membrane technology that outperforms other building alternatives and offers a faster, better build.

You can trust us to design and manufacture your facility with speed and quality that will exceed your expectations. Our clients demand it; our history proves it. In business since 1887, Sprung has completed over 12,000 structures in more than 100 countries.
